295	MEDICATION GUIDE
296	Soliris (eculizumab)
297	(so-leer-is)
298 299 300 301	Read the Medication Guide before you start Soliris and before each dose (infusion). This Medication Guide does not take the place of talking with your doctor about your condition or your treatment. Talk to your doctor if you have any questions about your treatment with Soliris.
302	What Is The Most Important Information I Should Know About Soliris?
303 304	Soliris is a medicine that affects your immune system. Soliris can lower the ability of your immune system to fight infections.
305 306	• Soliris increases your chance of getting serious and life-threatening meningococcal infections.
307 308 309 310	1. You must receive a meningococcal vaccine at least 2 weeks before your first dose of Soliris unless you have already had this vaccine.
311 312 313 314	 If you had a meningococcal vaccine in the past, you might need a booster dose before starting Soliris. Your doctor will decide if you need another dose of a meningococcal vaccine.
315 316 317	3. A meningococcal vaccine does not prevent all meningococcal infections. You must be aware of the following signs and symptoms of a meningococcal infection:
318 319 320 321 322 323 324 325	 moderate to severe headache with nausea or vomiting moderate to severe headache and a fever moderate to severe headache with a stiff neck or stiff back fever of 103° F (39.4° C) or higher fever and a rash confusion severe muscle aches with flu-like symptoms, and eyes sensitive to light
326 327	Call your doctor or get emergency medical care right away if you have any of these symptoms.
328 329 330	You will receive a Patient Safety Card that lists these symptoms and what to do if you have them. Carry it with you at all times. You will need to show the card to any healthcare provider that treats you.
331	What Is Soliris?
332 333 334	Soliris is a medicine called a monoclonal antibody. Soliris is used for the treatment of patients with a disease that affects red blood cells called Paroxysmal Nocturnal Hemoglobinuria (PNH).
335 336 337 338 339	 Soliris works by blocking part of your immune system. This can help your PNH symptoms but it can also increase your chance for infection. It is important that you: have all recommended immunizations and vaccines before you start Soliris stay up-to-date with all recommended immunizations and vaccines during treatment with Soliris
340	Who Should Not Receive Soliris?

Who Should Not Receive Soliris?

Do not receive Soliris if you: 341

- have a meningococcal infection
- have not been vaccinated with, or you are not up-to-date with a meningococcal vaccine.
- See "What is the most important information about Soliris?"

345 Tell your doctor if you:

- have an infection or fever
- are pregnant, become pregnant, or are breastfeeding. Soliris has not been studied in pregnant or nursing women.

349 **How Do I Receive Soliris?**

- Soliris is given through a vein (I.V. infusion) over 35 minutes.
- You will usually receive a Soliris infusion:
- o every 7 days for five weeks, then
- o every 14 days
- Following each infusion, you may be monitored for one hour for allergic reactions.

What If I Miss a Dose or Stop Soliris Treatment?

- If you forget or miss a Soliris infusion, call your doctor right away.
- Stopping treatment with Soliris may cause a sudden and serious breakdown of your red blood cells. Symptoms or problems from red blood cell breakdown include:
 - o a large drop in your red blood cell count causing anemia
- o confusion

355

356

359

367

368 369

378

- o chest pain
